Statement of Work – Invasive Species Demonstration Project

Purpose

Collaboration between the Department of Workforce Development (DWD) through its partnership with regional workforce development boards and the Department of Natural Resources (DNR) to establish new youth employment summer opportunities. It is the intent of the project to successfully establish a permanent link

between DNR and DWD as well as its regional workforce development boards to pursue youth summer employment opportunities.

Youth would be employed in areas with water landings that are known to contain invasive species. Youth would work to inform/educate boaters about invasive species removal and would also act as inspectors of watercraft.

WDBs will provide the following:

- Identification of appropriate youth to fill up to 5 slots for the demonstration project
- Each slot will be paid at \$8 per hour, for 20 hours per week for up to 8 weeks.
- Each youth will be WIA eligible and enrolled and reported as an ARRA youth.
- Payroll costs, associated FICA, Workers Compensation and other payroll related costs, plus a 10% administrative allowance are the only costs chargeable to this grant.
- Transportation and other supportive services are required to be funded out of other ARRA or WIA funds.

DWD encourages the local boards to obtain additional work experience opportunities with DNR if possible.

DNR will be contracted to provide training for the youth and up to one WDB person per board, scheduled for the week of June 15, and worksite supervision for the participants.
